Intermediate Ruby:

Ruby Method Arguements: Beyond basic variables

Array Decomposition: Parentheses

```ruby
def my_method my_string, (array_elet_1, array_elet_2)
    puts my_string
    puts array_elet_1
    puts array_elet_2
end
```

Ruby Method Arguements: Beyond basic variables

Variable number of args:

```
def my_method *my_array
    puts my_array
end
```

Intermediate Ruby:

Ruby Method Arguements: Beyond basic variables

Keyword Arguments: can take any order

```ruby
def my_method my_string: "asdf", my_array: []
    puts my_string
    puts my_array
end
```

*must follow "normal" positional arguments
